

Permit to import conditionally non-prohibited goods

This permit is issued under *Biosecurity Act 2015* Section 179 (1)

Permit: 0004778559

**Valid for: multiple consignments
between 14 December 2020 and 14 December 2022**

This permit is issued to: ALS Pty Ltd
2 Byth Street
STAFFORD QLD 4053
Australia

Attention: Mrs Kerri Taylor

This permit is issued for the import of Biological products (Non-standard goods).

Exporter details:	Various exporters
Country of export:	Various countries

This permit includes the following good(s). Refer to the indicated page for details of the permit conditions:

1. Soil and water samples End use: In-vitro Country of origin: Various countries Permit Conditions: Environmental samples for use in a laboratory (culturing and isolation not permitted)	Page 4
2. Food samples for analysis or taste testing End use: In-vitro Country of export: Various countries Country of origin: Various countries Permit Conditions: Food samples for laboratory testing	Page 9
3. Soil and water samples End use: In-vitro Country of origin: Various countries Permit Conditions: Environmental samples for use in a laboratory (culturing and isolation permitted)	Page 11

NOTE: Where a good has more than one set of permit conditions please read each set to determine which set of permit conditions applies to a specific consignment.

This permit is granted subject to the requirement that fees determined under section 592(1) are paid.

Lina Tze
Delegate of the Director of Biosecurity
Date: 14 December 2020

----- **End of commodity list** -----

Important information about this permit and the import of goods

Note: This permit covers Department of Agriculture, Water and the Environment biosecurity requirements. It is your responsibility to ensure all legal requirements relating to the goods described in this import permit are met. While you should rely on your own inquiries, the following information is provided to assist you in meeting your legal obligations in relation to the importation of the goods described in this import permit.

Authority to import

You are authorised to import the goods described in this import permit under the listed conditions.

Compliance with permit conditions and freedom from contamination

All imports may be subject to biosecurity inspection on arrival to determine compliance with the listed permit conditions and freedom from contamination. Imports not in compliance or not appropriately identified or packaged and labelled in accordance with the import conditions they represent may be subject to treatment, export or destruction at the importer's expense, or forfeited to the Commonwealth.

Compliance with other regulatory provisions

Additionally, all foods imported into Australia must comply with the provisions of the *Imported Food Control Act 1992*, and may be inspected and/or analysed against the requirements of the Australia New Zealand Food Standards Code.

All imports containing or derived from genetically modified material must comply with the *Gene Technology Act 2000*.

It is the importer's responsibility to identify and ensure they have complied with all requirements of any other regulatory organisations and advisory bodies prior to and after importation. Organisations include the Department of Home Affairs, the Department of Health, Therapeutic Goods Administration, Australian Pesticides and Veterinary Medicines Authority, Food Standards Australia New Zealand and any state agencies such as Departments of Agriculture and Health and Environmental Protection authorities. Importers should note that this list is not exhaustive.

Change of import conditions

Import conditions are subject to change at the discretion of the Director of Biosecurity. This permit may be suspended or revoked without notice.

Notification of import

Notification of the import must be provided to the Department of Agriculture, Water and the Environment for all imported goods other than goods imported as accompanied baggage or goods imported via the mail and not prescribed under *the Customs Act 1901*. Notification must be consistent with the Biosecurity Regulation 2016.

Valid import permit

The importer must hold a valid import permit at the time when the goods are brought or imported into Australian Territory.

The importer must verify that they hold a valid import permit in relation to the consignment by providing positive identification to the Department of Agriculture, Water and the Environment, by either:

- i. Submitting (or providing) the permit for biosecurity clearance.

OR

- ii. Providing any physical, digital or verbal information that allows the permit to be identified at the time of biosecurity clearance.

Provision of required documentation

All required documentation must accompany each consignment. Alternatively, necessary documentation will need to be presented to the Department of Agriculture, Water and the Environment at the time of clearance. In order to facilitate clearance, airfreight or mail shipments should have all documentation securely attached to the outside of the package, and clearly marked "Attention Department of Agriculture, Water and the Environment". Documentation may include the import permit (or import permit number), government certification and invoice.

If the product description on the import permit varies from the identifying documentation provided for clearance, the importer is responsible for providing evidence to the biosecurity officer that the import permit covers the goods in the consignment.

Any documentation provided must comply with the Department of Agriculture, Water and the Environment's minimum documentation requirements policy.

Permit conditions

It is the importer's responsibility to ensure that the following permit conditions are met in relation to each consignment. Where more than one set of permit conditions is shown for a good please read each set of conditions to determine which applies to a specific consignment.

1. Environmental samples for use in a laboratory (culturing and isolation not permitted)

This section contains permit conditions for the following commodity (or commodities):

1. Soil and water samples

1.1. Biosecurity Pathway

- a. These conditions allow for the import of the following products only:
Soil and water samples and related material (sewage and sludge samples).
- b. Goods imported using this import permit are for *in vitro* laboratory studies only.
- c. The liquid or water samples must be imported in a volume less than or equal to 1 kg or 1 L per individually packaged unit. The solid or soil samples must be imported in volumes less than or equal to 1 kg or 1 L per individually packaged unit.
- d. The products are for use at the following approved arrangement site:
 - Australian Laboratory Services Pty Ltd (Q2314)
2 Byth Street
STAFFORD QLD 4053

 - Australian Laboratory Services Pty Ltd (Q1817)
Sample Receipt Mineral, 32 Shand Street
STAFFORD QLD 4053

 - Australian Laboratory Services Pty Ltd (Q0048)
14-15 Desma Court
BOHLE QLD 4818

 - Australian Laboratory Services Pty Ltd (N0115)
Ground Floor, In-Organics Laboratory, 277-289 Woodpark Road
SMITHFIELD NSW 2164

 - University of South Australia (S0221)
Room 1-21, Building IW, Mawson Lakes Campus
MAWSON LAKES SA 5095

 - Australian Laboratory Services Pty Ltd (W0025)
31 Denninup Way
MALAGA WA 6090

 - Australian Laboratory Services Pty Ltd (V1624)
2-4 Westall Road
SPRINGVALE VIC 3171

Department of Health Queensland (Q2822)
Room 2226, Level 2, Block 2 Phycology - Organic Chemistry, 39 Kessels Road
COOPERS PLAINS QLD 4108

Department of Industry, Science, Energy and Resources (N2429)
Room L2.2.004, Level 2, Building 2, 105 Delhi Road, North Ryde Riverside Corporate
Centre Precinct
NORTH RYDE NSW 2113

Eurofins Environment Testing Australia Pty Ltd (Q2767)
1/21 Smallwood Place
MURARRIE QLD 4172

Eurofins Environment Testing Australia Pty Ltd (V2988)
Environment lab, 6 Monterey Road
DANDENONG SOUTH VIC 3175

Ecowise Australia Pty Ltd (V2809)
Rooms G15, G13, G65, G11, G12, G10, G08, G09, G07, G06, G62, G05, G03, Ground
Floor, ALS Life Sciences, 22 Dalmore Drive
SCORESBY VIC 3179

Ecowise Australia Pty Ltd (V2841)
G22, G23, G24, G25, Ground Floor, ALS Life Sciences, 22 Dalmore Drive
SCORESBY VIC 3179

Ecowise Australia Pty Ltd (V2842)
G26, G27, G28, G29, G30, Ground Floor, ALS Life Sciences, 22 Dalmore Drive
SCORESBY VIC 3179

Ecowise Australia Pty Ltd (V2843)
G33, G34, G36, G37, G38, Ground Floor, ALS Life Sciences, 22 Dalmore Drive
SCORESBY VIC 3179

- .
- e. These sites must have current approval from the Department of Agriculture, Water and the Environment as a class 5 approved arrangement site at the time of importation and until such time that all imported material and its derivatives are removed for disposal or export.
 - f. The goods and their derivatives shall not be removed from these sites, except for treatment, disposal or export, without the prior approval of the Director of Biosecurity.
 - g. The level of containment must be BC 1 or higher.
 - h. Where more than one approved arrangement site is listed, the samples may be transferred between the listed sites. All records of transfer must be maintained for audit purposes.
 - i. It is the importer's responsibility to ensure that the goods are labelled '*in vitro* use only' or equivalent on the smallest packaged unit prior to transferring material between AA sites.
 - j. **Post entry/end use conditions**

Approved end use:

1. *in vitro* laboratory studies

These conditions do not permit:

1. culturing or isolating microorganisms and infectious agent
2. the synthesis of replication-competent microorganisms, infectious agent or homologues.

Additional written approvals are required prior to direct or indirect use:

1. *in vivo* in laboratory organisms. Laboratory organisms are guinea pigs, hamsters, mice, rats, rabbits or microorganisms contained under laboratory or animal house conditions
2. *in vivo* in non-laboratory organisms e.g. chickens, sheep, cattle
3. in plants.

For more information on how to obtain additional written approvals contact imports@agriculture.gov.au or call 1800 900 090.

Where applicable, the importer or end user must comply with:

1. International (e.g. [International Air Transport Association](#)) and domestic requirements concerning the safe handling, transport and labelling of biological material
2. AS/NZS 2243 Safety in Laboratories standards
3. [Office of the Gene Technology Regulator \(OGTR\)](#) requirements
4. The [Security Sensitive Biological Agents \(SSBA\) regulatory scheme](#).

Records of treatment, disposal and release of all imported items must be retained by the AA site for Department of Agriculture, Water and the Environment audit purposes.

- k. These goods may only be used for the following purposes:

The goods must be used for chemical analysis including but not limited to analysis of the following:

- Physical parameters: pH, conductivity, suspended solids, total dissolved solids, fluoride, alkalinity etc.
- Metals – Arsenic, Cadmium, Cobalt, Copper, Mercury, Sodium, Nickel, Lead, Zinc etc.
- Organics – semivolatiles, volatiles, pesticides, PAH / Phenols, PFAS, Butyltins etc.
- Non-Metals – Nitrogen, Phosphorus, Sulfate, Chloride, Hexavalent Chromium etc.

- l. The goods may be treated using one of the following treatment methods. The goods may then be disposed of as biosecurity waste or released from biosecurity control following treatment.

Soil samples (and other non-liquid goods)

1. dry heat treatment at 160°C for 2 hours (sample must not exceed 500g in weight) (applied in the current AA or AA class 12.3 or 4.1), or

2. heat treatment in an autoclave at 121°C, 103kPa (15 psi) for 30 minutes (applied in the current AA or AA class 8.3), or
3. heat treatment in an autoclave at 134°C, 103kPa (15 psi) for 4 minutes (applied in the current AA or AA class 8.3), or
4. ionising radiation to a level that achieves a minimum absorbed dose of 50kGy (applied in AA class 4.2).

Water samples (and other liquid goods)

1. heat treatment in an autoclave at 121°C, 103kPa (15 psi) for 30 minutes (applied in current AA or AA class 8.3), or
2. heat treatment in an autoclave at 134°C, 103kPa (15 psi) for 4 minutes (applied in current AA or AA class 8.3), or
3. heat treatment at a minimum core temperature of 100°C for at least 30 minutes (applied in the current AA or AA class 12.3 or 4.1), or
4. ionising radiation to a level that achieves a minimum absorbed dose of 50kGy (applied in AA class 4.2).

m. The goods may be treated using one of the following additional treatment methods. The goods may then be disposed of as biosecurity waste or released from biosecurity control following treatment.

1. Complete acid digestion using a combination of one or other of concentrated hydrochloric (HCl 32-37%/~12M), nitric (HNO₃ 65-70%/16M), perchloric (HClO₄ ~70%/11M), sulphuric (H₂SO₄ 95- 98%/~18M) and hydrofluoric (HF 40-48%/~27M) acid in either:

- 1.1. a microwave digestion system at ≥ 150 °C and ≥ 15 psi for at least 20 minutes, or
- 1.2. heating block at a minimum of 100 °C for at least 30 minutes.

2. High temperature combustion (>600°C).

3. Atomic absorption spectrometry (AAS) where the sample is atomised using a flame atomiser, or graphite furnace.

4. Thermoluminescence dating in which the sample material is progressively heated from 110 °C to at least 350 °C (excludes low temperature thermoluminescence).

5. Induction coupled plasma (ICP) linked to mass spectrometer or optical emission spectrometer (ICP-MS or ICP-OES).

6. Gas chromatography/mass spectrometry (GC-MS).

7. Thermal ionisation/MS (TIMS).

8. Electron ionisation/MS.

9. Atmospheric pressure chemical ionisation/MS.

PLEASE NOTE: Soil and water samples and related material may be released from biosecurity containment if the samples are subjected to any of the analysis methods listed above. If any amount of the goods is not completely destroyed following analysis, the

- remaining samples must be treated using one of the treatment methods listed under point 1.1(l) above before disposal as biosecurity waste or before being permitted to be released from biosecurity control.
- n. On completion of work all imported materials and the direct or indirect derivatives thereof must be disposed of by treatment methods (as listed) or other methods approved in writing by the Director of Biosecurity.
- o. **Additional post entry conditions**
For clarity of conditions under 1.1(h), transfer of imported goods between approved arrangement sites listed under 1.1(d) is permitted only from sites that are of the same level of containment or from a site that is of a lower containment (e.g. BC1) to a site of higher containment (e.g. BC2). Transfer of imported goods from a site of higher containment (e.g. BC2) to a site of lower containment (e.g. BC1) is not permitted without prior written approval from the Director of Biosecurity, except if the goods are released from biosecurity control following treatment using a method listed under 1.1(l).
- p. **Commercial administrative conditions**
Documents must be provided with each consignment which:
1. identify the consignment (if non-personal) e.g. entry number
 2. identify all goods being imported as part of this consignment e.g. invoice or waybill or importer's manifest
 3. describe the goods being imported (where not clear).
e.g. 1: Product XRab = Purified protein derived from rabbits
e.g. 2: Product AX = Synthetic antibiotic
e.g. 3: Comte = Cheese.
- q. Under the [Biosecurity Charges Imposition \(General\) Regulation 2016](#) and Chapter 9, Part 2 of the [Biosecurity Regulation 2016](#), fees are payable to the Department of Agriculture, Water and the Environment for all services. Detail on how the department applies fees and levies may be found in the [Charging guidelines](#).
- r. In addition to the conditions for the goods being imported, non-commodity concerns must be assessed including container cleanliness, packaging and destination concerns, and may be subject to inspection and treatment on arrival. Please refer to the Non-Commodity Cargo Clearance BICON case for further information.

2. Food samples for laboratory testing

This section contains permit conditions for the following commodity (or commodities):

2. Food samples for analysis or taste testing

2.1. Biosecurity Pathway

- a. These conditions allow for the import of the following products only:
Food Samples excluding fresh fruit and vegetables, raw nuts, whole grains, prawns, salmonid fish, raw meat* and raw egg

*All imported meat samples must have undergone a heat treatment
- b. This permit allows for the importation of food products as samples for the purposes of scientific or commercial evaluation only.
- c. The food sample is not permitted to be used in a taste panel or for consumption by any person or animal.
- d. The products are for use at the following approved arrangement site:

Australian Laboratory Services Pty Ltd (Q2314)
2 Byth Street
STAFFORD QLD 4053

Australian Laboratory Services Pty Ltd (Q1817)
Sample Receipt Mineral, 32 Shand Street
STAFFORD QLD 4053

Australian Laboratory Services Pty Ltd (Q0048)
14-15 Desma Court
BOHLE QLD 4818

Australian Laboratory Services Pty Ltd (N0115)
Ground Floor, In-Organics Laboratory, 277-289 Woodpark Road
SMITHFIELD NSW 2164

Department of Industry, Science, Energy and Resources (N2429)
Room L2.2.004, Level 2, Building 2, 105 Delhi Road, North Ryde Riverside Corporate Centre Precinct
NORTH RYDE NSW 2113

Department of Health Queensland (Q2822)
Room 2226, Level 2, Block 2 Phycology - Organic Chemistry, 39 Kessels Road
COOPERS PLAINS QLD 4108

.
- e. These sites must have current approval from the Department of Agriculture, Water and the Environment as a class 5 approved arrangement site at the time of importation and until such time that all imported material and its derivatives are removed for disposal or export.
- f. The goods and their derivatives shall not be removed from these sites, except for disposal or

- export, without the prior approval of the Director of Biosecurity.
- g. The level of containment must be at least AA site 5.1, 5.11 or higher.
 - h. Where more than one approved arrangement site is listed, the samples may be transferred between the listed sites. All records of transfer must be maintained for audit purposes.
 - i. Work must be limited to *in vitro* laboratory studies only. This does not include *in vivo* use in any animal, laboratory organisms or plants (or veterinary vaccine or veterinary therapeutic manufacture) without prior written approval from the Department of Agriculture, Water and the Environment.
 - j. The import permit does not permit the direct or indirect exposure of the imported materials or derivatives to non-laboratory organisms or plants.
 - k. The import permit does not permit the use of samples for isolation, culture or synthesis of replication competent microorganisms, infectious agents and their homologues, other than as required for food safety testing as outlined in the Australia New Zealand Food Standards Code: [Microbiological limits for food](#) or the [Compendium of Microbiological Criteria for Food](#).
 - l. On completion of work all imported materials and the direct or indirect derivatives thereof shall be disposed of by export, by Department of Agriculture, Water and the Environment approved treatment methods or other methods approved in writing by the Director of Biosecurity.
 - m. **Commercial administrative conditions**
Documents must be provided with each consignment which:
 - 1. identify the consignment (if non-personal) e.g. entry number
 - 2. identify all goods being imported as part of this consignment e.g. invoice or waybill or importer's manifest
 - 3. describe the goods being imported (where not clear).
 - e.g. 1: Product XRab = Purified protein derived from rabbits
 - e.g. 2: Product AX = Synthetic antibiotic
 - e.g. 3: Comte = Cheese.
 - n. Under the [Biosecurity Charges Imposition \(General\) Regulation 2016](#) and Chapter 9, Part 2 of the [Biosecurity Regulation 2016](#), fees are payable to the Department of Agriculture, Water and the Environment for all services. Detail on how the department applies fees and levies may be found in the [Charging guidelines](#).
 - o. In addition to the conditions for the goods being imported, non-commodity concerns must be assessed including container cleanliness, packaging and destination concerns, and may be subject to inspection and treatment on arrival. Please refer to the Non-Commodity Cargo Clearance BICON case for further information.

3. Environmental samples for use in a laboratory (culturing and isolation permitted)

This section contains permit conditions for the following commodity (or commodities):

3. Soil and water samples

3.1. Biosecurity Pathway

- a. These conditions allow for the import of the following products only:
Soil and water samples and related material
- b. Goods imported using this import permit are for *in vitro* laboratory studies only.
- c. The liquid or water samples must be imported in a volume less than or equal to 1 kg or 1 L per individually packaged unit.
- d. The products are for use at the following approved arrangement site:
Commonwealth Scientific and Industrial Research Organisation (Q2687)
L and W, 1.A.401-411, 435, Ecosciences Precinct, 41 Boggo Road
DUTTON PARK QLD 4102
.
- e. The soil samples must be imported in a volume less than or equal to 1 kg or 1 L per individually packaged unit.
- f. These sites must have current approval from the Department of Agriculture, Water and the Environment as a class 5 approved arrangement site at the time of importation and until such time that all imported material and its derivatives are removed for disposal or export.
- g. The goods and their derivatives shall not be removed from these sites, except for treatment, disposal or export, without the prior approval of the Director of Biosecurity.
- h. The level of containment must be BC 2 or higher.
- i. Where more than one approved arrangement site is listed, the samples may be transferred between the listed sites. All records of transfer must be maintained for audit purposes.
- j. It is the importer's responsibility to ensure that the goods are labelled '*in vitro* use only' or equivalent on the smallest packaged unit prior to transferring material between AA sites.
- k. **Post entry/end use conditions**
Approved end uses:
 1. *in vitro* laboratory studies.

Additional written approvals are required prior to direct or indirect use:

1. *in vivo* in laboratory organisms. Laboratory organisms are guinea pigs, hamsters, mice, rats, rabbits or microorganisms contained under laboratory or animal house conditions
2. *in vivo* in non-laboratory organisms e.g. chickens, sheep, cattle
3. in plants.

For more information on how to obtain additional written approvals contact

imports@agriculture.gov.au or call 1800 900 090.

Where applicable, the importer or end user must comply with:

1. International (e.g. [International Air Transport Association](#)) and domestic requirements concerning the safe handling, transport and labelling of biological material
2. AS/NZS 2243 Safety in Laboratories standards
3. [Office of the Gene Technology Regulator \(OGTR\)](#) requirements
4. The [Security Sensitive Biological Agents \(SSBA\) regulatory scheme](#).

Records of treatment, disposal and release of all imported items must be retained by the AA site for Department of Agriculture, Water and the Environment audit purposes.

- l. These goods may only be used for the following purposes:

These conditions do not permit:

1. culturing or isolating of infectious agents.
2. the synthesis of replication-competent infectious agents or homologues.

Infectious agents (diseases) include any of the following:

- a virus
- a prion
- a plasmid
- a viroid
- a thing that is part of an infectious agent (examples: capsids, envelopes, enzymes, genetic material coding for an infectious agent, proteins)

The samples will be used for microorganism analysis such as Membrane Filtration, Most Probable Number (MPN) analysis, and/or Spread Plate analysis.

- m. The goods may be treated using one of the following treatment methods. The goods may then be disposed of as biosecurity waste or released from biosecurity control following treatment.

Soil samples (and other non-liquid goods)

1. dry heat treatment at 160°C for 2 hours (sample must not exceed 500g in weight) (applied in the current AA or AA class 12.3 or 4.1), or
2. heat treatment in an autoclave at 121°C, 103kPa (15 psi) for 30 minutes (applied in the current AA or AA class 8.3), or
3. heat treatment in an autoclave at 134°C, 103kPa (15 psi) for 4 minutes (applied in the current AA or AA class 8.3), or
4. ionising radiation to a level that achieves a minimum absorbed dose of 50kGy (applied in AA class 4.2).

Water samples (and other liquid goods)

1. heat treatment in an autoclave at 121°C, 103kPa (15 psi) for 30 minutes (applied in current AA or AA class 8.3), or

2. heat treatment in an autoclave at 134°C, 103kPa (15 psi) for 4 minutes (applied in current AA or AA class 8.3), or
 3. heat treatment at a minimum core temperature of 100°C for at least 30 minutes (applied in the current AA or AA class 12.3 or 4.1), or
 4. ionising radiation to a level that achieves a minimum absorbed dose of 50kGy (applied in AA class 4.2).
- n. The goods may be treated using one of the following additional treatment methods. The goods may then be disposed of as biosecurity waste or released from biosecurity control following treatment.
1. Complete acid digestion using a combination of one or other of concentrated hydrochloric (HCl 32-37%/~12M), nitric (HNO₃ 65-70%/16M), perchloric (HClO₄ ~70%/11M), sulphuric (H₂SO₄ 95- 98%/~18M) and hydrofluoric (HF 40-48%/~27M) acid in either:
 - 1.1. a microwave digestion system at ≥ 150 °C and ≥ 15 psi for at least 20 minutes, or
 - 1.2. heating block at a minimum of 100 °C for at least 30 minutes.
 2. High temperature combustion (>600°C).
 3. Atomic absorption spectrometry (AAS) where the sample is atomised using a flame atomiser, or graphite furnace.
 4. Thermoluminescence dating in which the sample material is progressively heated from 110 °C to at least 350 °C (excludes low temperature thermoluminescence).
 5. Induction coupled plasma (ICP) linked to mass spectrometer or optical emission spectrometer (ICP-MS or ICP-OES).
 6. Gas chromatography/mass spectrometry (GC-MS).
 7. Thermal ionisation/MS (TIMS).
 8. Electron ionisation/MS.
 9. Atmospheric pressure chemical ionisation/MS.
- PLEASE NOTE: Soil and water samples and related material may be released from biosecurity containment if the samples are subjected to any of the analysis methods listed above. If any amount of the goods is not completely destroyed following analysis, the remaining samples must be treated using one of the treatment methods listed under point 3.1(m) above before disposal as biosecurity waste or before being permitted to be released from biosecurity control.
- o. On completion of work all imported materials and the direct or indirect derivatives thereof must be disposed of by treatment methods (as listed) or other methods approved in writing by the Director of Biosecurity.
- p. **Commercial administrative conditions**
Documents must be provided with each consignment which:
1. identify the consignment (if non-personal) e.g. entry number
 2. identify all goods being imported as part of this consignment e.g. invoice or waybill or

importer's manifest

3. describe the goods being imported (where not clear).
 - e.g. 1: Product XRab = Purified protein derived from rabbits
 - e.g. 2: Product AX = Synthetic antibiotic
 - e.g. 3: Comte = Cheese.
- q. Under the [Biosecurity Charges Imposition \(General\) Regulation 2016](#) and Chapter 9, Part 2 of the [Biosecurity Regulation 2016](#), fees are payable to the Department of Agriculture, Water and the Environment for all services. Detail on how the department applies fees and levies may be found in the [Charging guidelines](#).
- r. In addition to the conditions for the goods being imported, non-commodity concerns must be assessed including container cleanliness, packaging and destination concerns, and may be subject to inspection and treatment on arrival. Please refer to the Non-Commodity Cargo Clearance BICON case for further information.
